IT PROFESSIONAL · NETWORK & HEALTHCARE INFORMATION SYSTEMS

Van David Niccolo Fontanilla

vanfontanillavf@gmail.com | 0927 821 9037 | San Fernando City, La Union

PROFILE

IT professional with nearly 10 years of experience in network administration, healthcare information systems, and software quality assurance. I'm skilled in Microsoft SQL, LAN/WAN management, system security, and data-driven reporting, and I'm known for dependable technical support and turning data into practical insights for management. I also bring a creative edge from my background in graphic design and multimedia.

EXPERIENCE

Computer Maintenance Technologist II
2024 – Present

Ilocos Training and Regional Medical Center

- Manage, configure, and maintain local and wide area networks (LAN/WAN), including wired and wireless connectivity.
- Implement network security modules, anti-virus/anti-spam tools, firewalls, and security patches; manage configuration backups, data files, and disaster recovery plans.
- Provide tier-2 technical support for hardware, end-user devices, application systems (AD, DNS, SMTP, email), and internet connectivity, escalating to service providers when necessary.
- Install, upgrade, and perform preventive and corrective maintenance on computers, servers, peripherals, printers, and VoIP devices.

Information System Analyst
2020 – 2024

Ilocos Training and Regional Medical Center

- Analyzed current and historical hospital data to identify performance trends.
- Prepared reports and communicated their insights to stakeholders.
- Consulted with the management team to develop a long-term information technology plan.
- Recommended processes and improvements based on data findings.

Project Coordinator / Systems Support
2017 – 2020

Kaiser Dela-Cruz Consulting Inc. | Medsys

- Participated in and supported development pilots during the initial phases of all projects.
- Created test scenarios covering operational and implementation use cases.
- Investigated, analyzed, and resolved customer-related issues tied to test failures; tracked system issues and defects.
- Developed and executed test scripts in Microsoft SQL; mentored team members and delivered program presentations.
- Modified stored procedures (Microsoft SQL) to meet client customization requests.
- Facilitated, trained, organized, and maintained new clients; maintained test process documentation.

Graphic Artist / Systems Developer (Intern)
2016

Lorma Colleges — Marketing Department

- Photographed, designed, edited, toned, and captioned marketing materials.
- Developed and maintained the marketing repository system.
